eLearning Alabama courses consist of a one week online orientation followed by six weeks of academics. Each weekly session contains readings, activities, and discussion questions. Although there is no requirement to be online on any given day or at any given time, all weekly assignments must be completed within that week. The learning comes from the interaction of the eLearning community. Participants are expected to complete the reading and activity assignments, post their reflective thoughts on the weekly discussion question(s), read ALL the discussion posts of their classmates, AND reply to one or two of their classmates’ comments. Each course also requires completion of a Final Project - one that can be used by the participant in classrooms. The project must be completed within 30 days of the course end and may be a collaborative effort.

eLearning Alabama uses Web-based models to provide effective professional development that leads to gains in teachers’ content knowledge, improvement in their teaching practices and increases in the achievement of their students.

Course Overviews

CCRSELA01: ELA College and Career Ready Standards Overview for K-5

This course is designed to aid K-5 educators in becoming familiar with the Alabama College and Career Ready Standards for English Language Arts, key shifts in ELA, and vertical alignment/learning progressions. Participants will be able to plan and implement lessons that integrate the ELA College and Career Ready Standards into their classroom practice.

CCRSELA02: ELA College and Career Ready Standards Overview for 6-12

This course is designed to aid 6-12 educators in becoming familiar with the Alabama College and Career Ready Standards for English Language Arts, key shifts in ELA, and vertical alignment/learning progressions. Participants will be able to plan and implement lessons that integrate the ELA College and Career Ready Standards into their classroom practice.

CCRSLIT01: College and Career Ready Standards for the Content Areas Overview

This course is designed to aid 6-12 educators in becoming familiar with the Alabama College and Career Ready Literacy Standards for History/Social Studies; Science and Technical Subjects. Participants will be able to plan and implement lessons that integrate the College and Career Ready Literacy Standards into their classroom practice.

CCRS MTH01: CCRS MATH Standards for Mathematical Practice Overview for K-5

This course is designed to aid K-5 educators in becoming familiar with the Alabama College and Career Ready Standards for Mathematical Practices; recognize students that exhibit these criteria, and integrate the standards with instruction to support mathematical proficiency. The course will enable teachers to plan, implement, and evaluate these practices embedded in exemplary lessons.

CCRS MTH02: CCRS MATH Standards for Mathematical Practice Overview for 6-12

This course is designed to aid 6-12 educators in becoming familiar with the Alabama College and Career Ready Standards for Mathematical Practices; recognize students that exhibit these criteria, and integrate the standards with instruction to support mathematical proficiency. The course will enable teachers to plan, implement, and evaluate these practices embedded in exemplary lessons.
